## Are You A Visionary Leader Who...

is eager to take a real step ahead of your competitors?  
Welcomes facilitated fresh thinking that enables you to  
eliminate internal bureaucracy, self-imposed obstacles and  
inertia? Injects enthusiasm throughout your organization?

## Advanced 21st Century Tools

STOP using yesterday's business practices! Many  
organizations limit their potential and stunt their growth  
by not using fresh, 21st Century business tools and  
techniques. See new options and possibilities that bring  
about real performance breakthroughs.

## Fresh Thinking — New Opportunities

IMAGINE self-discovered and real-time breakthroughs that  
engage, energize and align business leaders with their  
people — to bypass obstacles and road blocks with fresh  
thinking — achieving results beyond their best expectations.

We are so much more than consultants, trainers, or  
analysts. Our facilitated approach always works in the  
"real-time" so people see actual business possibilities;  
teams become aligned in their thinking; and everyone is  
personally committed to getting it done.

*Leadership Solutions has an  
impressive track record of  
success, working with businesses,  
government, nonprofit  
organizations, professional  
associations and individual  
executives and practitioners.*

## Leadership at All Levels

Leadership CAPACITY is the enabler for sustained growth,  
but is in short supply at all levels. The Leadership Solutions  
business framework enables organizations to differentiate  
and emphasize individual leadership roles from  
management roles; consequently increasing leadership  
capacity along with all of its contagiously positive influences.

A fresh focus and approach to leadership ignites the fire  
within people to tap strengths and abilities they never knew  
existed. More engaged and emotionally connected,  
EVERYONE's contribution and commitment levels naturally  
increase throughout the organization.

## Become "Outside-In" Market Attuned

When our clients gain a fresh Outside-In perspective of  
their business, they begin to market their visions to all key  
stakeholders. With our facilitated "Outside-In" perspective,  
leaders gain customer insights, uncover richly rewarding  
opportunities and realize competitive advantage by  
becoming more market attuned.

*Imagine...everyone in your  
organization working in  
alignment with renewed  
energy and a new-found  
sense of commitment.*

## Why Leadership Solutions?

Want to ignite or sustain accelerated business growth?  
Increase leadership effectiveness and capacity at all levels?  
Raise the level of initiative, commitment and accountability?  
Create an organization-wide understanding and  
appreciation for the power of teamwork? Encourage  
innovation and out-of-the-box thinking?

Tap the extensive business growth experience of Leadership  
Solutions gained by working with all size organizations in  
manufacturing, services, technology, financial, not-for-profit,  
education, engineering and other industries in both the US  
and Europe.
